All monetary amounts, unless otherwise indicated, are expressed in Canadian dollars. Additional regulatory filings for the Company can be found on the SEDAR+ website at www.sedarplus.ca. The Company’s website can be found at www.northernlightsresources.com.

Northern Lights Resources Corp. (the “Company” or “Northern Lights”) was incorporated under the laws of British Columbia on March 28, 2007. The Company’s principal business activities is acquiring projects for exploration and discovery of valuable mineral deposits . The Company was listed in October 2018 and traded on the Canadian Securities Exchange (“CSE”) under the symbol “NLR”.

Forward-Looking Statements

Certain statements contained in this document constitute “forward-looking statements”. When used in this document, the words “may”, “would”, “could”, “will”, “intend”, “plan”, “propose”, “anticipate”, “believe”, “forecast”, “estimate”, “expect” and similar expressions, as they relate to the Company or its management, are intended to identify forward-looking statements. Such statements reflect the Company’s current views with respect to future events and are subject to certain risks, uncertainties and assumptions. Many factors could cause the Company’s actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. Forward-looking statements herein include, but are not limited to, statements relating to the timing, availability and amount of financings; expected use of proceeds; business objectives; the costs and timing relating to the potential acquisition of interests in mineral properties; the timing and costs of future exploration activities on the Company’s future properties; success of exploration activities; permitting time lines and requirements for additional capital. In making forward-looking statements herein, the Company has applied several material assumptions, including, but not limited to, any additional financing needed will be available on reasonable terms, that general business and economic conditions will not change in a materially adverse manner, and that all necessary governmental approvals for the future exploration will be obtained in a timely manner and on acceptable terms. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such risks and other factors include, among others, risks related to the completion of financings and the use of proceeds; operations and contractual obligations; changes in exploration programs based upon results of exploration; future prices of metals; availability of third party contractors; availability of equipment; failure of equipment to operate as anticipated; accidents, effects of weather and other natural phenomena and other risks of the mineral exploration industry; environmental risks; community relations; and delays in obtaining governmental approvals or financing.

Going Concern

The condensed interim consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future. These conditions suggest a material uncertainty which may cast significant doubt on the Company's ability to continue as a going concern. The condensed interim consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

Secret Pass Gold Project

The Secret Pass Gold property consists of 868 hectares located in the heart of the Historic Oatman-Katherine gold mining district in northwest Arizona. This historical mining district produced 2 million ounces of gold and 1,000,000 ounces of silver between 1892 and 1940 at an average gold grade of over 15 g/t.

Medicine Springs Project

In December 2022, Reyna Silver Corp. ("Reyna Silver") completed the purchase of the remaining 25% interest of Medicine Springs held by the Company in consideration of cash payment of USD \$100,000, 6,000,000 common shares of Reyna Silver; and 1% NSR royalty over Medicine Springs Project licenses, of which 0.5% of the NSR royalty can be repurchased for cash consideration of USD2,500,000 at any time in the future.

In August 2025, Torex Gold Resources Inc. completed its acquisition of Medicine Spring from Reyna Silver, the NSR royalty remains in effect.

Results of Operations

The results of operations reflect the overhead costs incurred by the Company to maintain good standing with the various regulatory authorities and to provide an administrative infrastructure to manage the acquisition, and financing activities of the Company. General and administrative costs can be expected to increase or decrease in relation to the changes in activity required as property acquisition continues. The Company has not recorded, since the date of its incorporation, any revenues from its mineral exploration and development activities, nor does it expect to record any revenue over the course of the next 12 months.

General and Administrative Expenses

Liquidity and Capital Resources

At January 31, 2026, the Company had cash of \$352,455 (April 30, 2025 - \$1,052).

At January 31, 2026, the Company had a working capital deficiency of \$449,913 (April 30, 2025 - \$749,682).

The Company expects its current capital resources will not be sufficient to meet its business objectives or day-to-day operations through its next quarter or current operating year, and that its continuation as a going concern will be dependent on its ability to raise additional funds through equity issuances. There is no guarantee the Company will be successful in that regard. See "Overview and Going Concern" above.

Financial Risk Factors

The Company has applied a three-level hierarchy to reflect the significance of the inputs used in making fair value measurements. The three levels of fair value hierarchy are:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 – Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- Level 3 – Inputs for assets or liabilities that are not based on observable market data.

The Company's financial instruments consist of cash, marketable securities, accounts payable and accrued liabilities, convertible securities, and subscriptions receivable. The fair value of the accounts payable and accrued liabilities approximates their carrying values due to the short-term nature of these instruments. Cash and marketable securities are measured at fair value using level 1 inputs. Convertible securities are measured using level 2 inputs as it uses observable inputs other than quoted prices included within level 1.

The Company is exposed to a variety of financial risks by virtue of its activities including credit, liquidity, currency, interest rate, and other price risk. The Company's exposure to and management of these risks has not changed materially from that of the prior year.

a) **Market risk**

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. A portion of the Company's expenses are denominated in US dollars. As the Company's functional and presentation currency is the Canadian dollar, the Company is exposed to risk from changes in the US dollar exchange rate. The amounts are minimal and any risk due to foreign currency fluctuations is not significant.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk on the variable rate of interest earned on bank deposits. The fair value interest rate risk on bank deposits is insignificant as the deposits are short term.

The Company has not entered into any derivative instruments to manage interest rate fluctuations.

Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices, whether those changes are caused by factors specific to the individual financial instrument or its issuer or by factors affecting all similar financial instruments traded in the market. The Company exposure to price risk primarily attributed to marketable securities at January 31, 2026. The Company closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

b) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and subscriptions receivable. The Company limits its exposure to credit risk by placing its cash with a high credit quality financial institution in Canada. The maximum exposure to credit risk is the aggregate carrying amount of cash and subscriptions receivable.

c) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity risk is to ensure it has a planning and budgeting process in place to determine the funds required to support its ongoing operations and capital expenditures. The Company ensures that sufficient funds are raised from private placements, option exercises and warrant exercises to meet its working capital requirements, after taking into account existing cash and expected exercise of share purchase warrants and options.

Management believes that it will be successful in raising the necessary funds however, given the current market conditions, management believes that the raising of the required funds will take longer than is normal and will be at prices that may be less than desirable. There are no assurances that additional funds will be available on terms acceptable to the Company or at all. The Company does not have significant liquidity risk as all of its financial liabilities are current in nature.
